**Language Maintenance: Linguistic, Social, Affective, and Educational Dimensions**

The monograph unites diverse perspectives on language maintenance and investigates them from both a societal and an individual perspective. Issues of language contact are addressed, as well as linguistic, affective, social, and educational perspectives on language maintenance. Each chapter provides a state-of-the-art overview of the topic under discussion, with leads to further research literature. As such, the volume will be an invaluable resource for students at advanced undergraduate and graduate levels, academics in the field, teacher educators, and practitioners such as teachers who are working in multilingual settings or with multilingual students.
