Art. 25

Taking into account the state of the art, the cost of implementation and the nature, scope, context and purposes of processing as well as the risks of varying likelihood and severity for rights and freedoms of natural persons posed by the processing, the controller shall, both at the time of the determination of the means for processing solution qualifying Privacy by and at the time of the processing itself, implement appropriate technical and organisational measures, such as pseudonymisation, which are designed to implement dataprotection principles, such as data minimisation, in an effective manner and to integrate the necessary safeguards into the processing in order to meet the requirements of this Regulation and protect the rights of data subjects.

The controller shall implement appropriate technical and organisational measures for ensuring that, by default, only personal data which are necessary for each specific purpose of the processing are processed. That obligation applies to the amount of personal data collected, the extent of their processing, the period of their storage and their accessibility. In particular, such measures shall ensure that by default personal data are not made accessible without the individual's intervention to an indefinite number of natural persons.

Privacy should be managed for me as a service before I am engaged with a customer.

I need to be able to pitch our Design requirements

Marketing

We need cookie tracking technologies to gain more insights of our customers. Reduce efficiency, elevated risk of using marketing data. How do I make privacy work for me

User tracking is essential to our product design. We need more personal data to gain user insights. Data protection is the balance between user tracking and respect of their privacy

```
public static String encrypt(final String plaintext,
                           final String secret) {
    setKey(secret);
    Cipher cipher = Cipher.getInstance(
       "AES/ECB/PKCS5Padding");
    cipher.init(Cipher.ENCRYPT_MODE, secretKey);
    byte[] cipher= cipher.doFinal(plaintext.getBytes();
    return Base64.getEncoder().encodeToString(cipher);
  } catch (final Exception e) {
    LOG.error("Encryptiion error: " + e.toString());
  return null;
```

Access controls, Network security, Logging and Activity monitoring, Breach response **Encryption**

Support

There are five users just requested their data to be deleted before obtaining an archive of the data

Our service is privacy be design and comply with privacy by default design.

DPbDD

respects to data subjects rights

Marketing

We conduct DPIA regularly to assess the risk of processing personal data and we always keep the processing to the Our marketing data is accurate with minimal.

We register purpose of

data mapping system.

Personal data is deleted after retention period automatically.

We use software SDK to pseudonymize all personal processing personal data into our data.

> Personal data access is governed by our data protection system.

We use adaptive Laplace differential privacy to preserve data privacy in our artificial intelligence

We implemented ISO security controls to mitigate data risks

We fire drill our data breach procedure regularly

Support

Today 3 DSAR

5 data erasure requests have been fulfilled automatically by our system

Turn head winds such as breaches and violations into tail winds with consumer trust

Thank you!
