

OPEN ACCESS FOR SWEDEN

If you are a corresponding author affiliated with a participating institution, the Sweden Transformative Agreement means you can publish your article open access with fees covered, in more than 1,900 Springer hybrid journals.

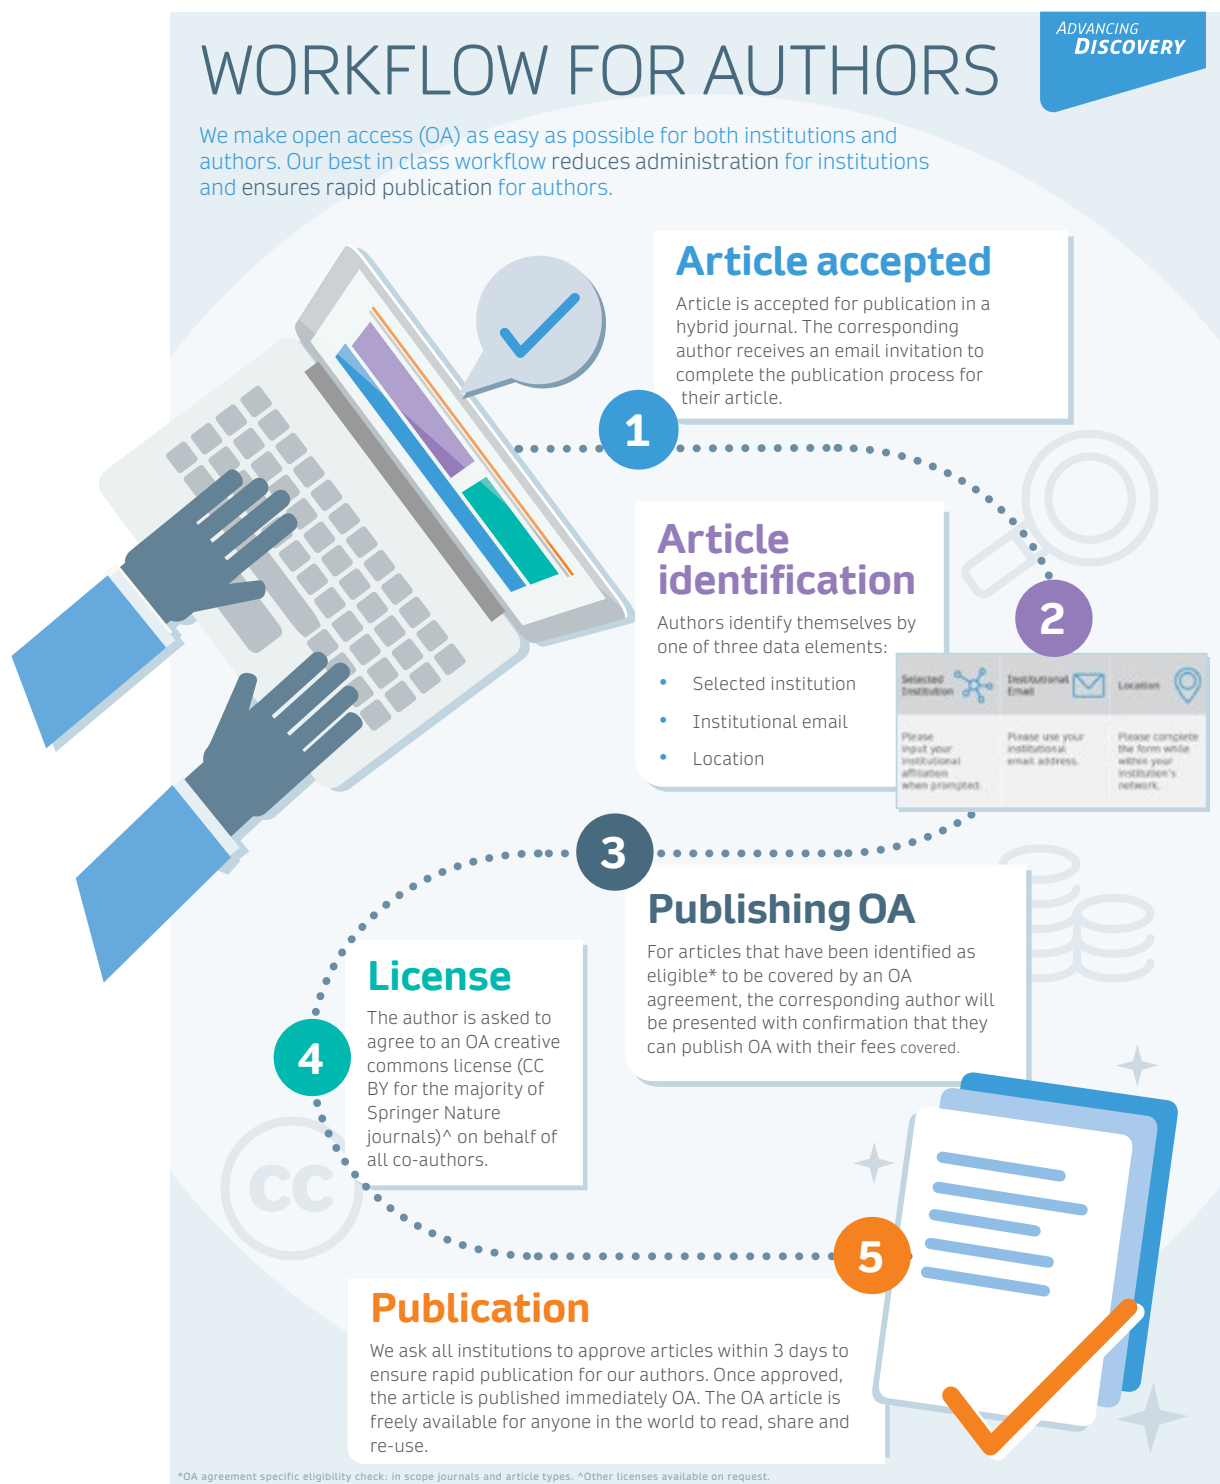

What authors need to know:

- You must be the corresponding author of the article.
- You must be affiliated with a participating institution.
- Article types eligible under this agreement are: Original Paper, Review Paper, Brief Communication and Continuing Education.
- You must identify yourself during the author identification process (you will be asked to do this once your article has been accepted for publication).
- The copyright remains with you: your open access article will be published under the Creative Commons Attribution (CC BY/ CC BY-NC) license – you are free to redistribute the material in any medium or format.

Benefits of open access:

- **Increased citation and usage:** Studies have shown that open access articles are viewed and cited more often than articles behind a paywall.
- **Wider collaboration:** Open access publications and data enable researchers to carry out collaborative research on a global scale.
- **Greater public engagement:** Content is available to those who can't access subscription content.
- **Faster impact:** With permissive licences like CC BY, researchers are empowered to build on existing research quickly.
- **Increased interdisciplinary conversation:** Open access journals that cross multiple disciplines help researchers connect more easily and provide greater visibility of their research.
- **Compliance with open access mandates:** Open access journals comply with major funding policies internationally.

The corresponding author is the author who handles the manuscript and correspondence during the publication process. The corresponding author has the authority to act on behalf of all co-authors in all matters pertaining to publication of the manuscript, and acts as the point of contact for any enquiries after the paper has been published.

Our system is very easy to use, but if you do run into any issues, we're happy to help. Please get in touch with oa.verification@springernature.com
